EDUCATION

Saveetha Engineering College

Chennai, Tamil Nadu

BE Computer Science; CGPA: 8.4

Nov. 2022 – Present

PROGRAMMING SKILLS

- **Languages:** Java, JavaScript, Typescript, Python (FAST Api)
- **Frontend & Backend Tools:** HTML, CSS, React.js, Next.js, Spring Boot, LangChain (GenAI)
- **Databases:** MySQL
- **Development tools:** Git, Github, VS Code, Postman

PROJECTS

Cashkernel — Money Manager App

HTML, CSS, JavaScript, React.js, Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL

- Designed and deployed a full-stack personal finance management application with secure user authentication and authorization using Spring Security
- Built and consumed REST APIs following MVC Architecture, integrated Brevo API for transactional emails and Cloudinary API for dynamic image storage and retrieval
- Maintained a clean, scalable project structure across frontend and backend; tested and debugged all APIs end-to-end using Postman
- Link: <https://cashkernel-moneymanager.netlify.app/>

Bank Management System

Java, OOPS, Exception Handling

- Built a Java-based banking application with features for account management and transaction handling
- Implemented Exception handling to store records securely and ensure reliable operations

TrekSphere-Website

HTML, CSS, TypeScript, React.js, Next.js

- Designed and deployed a responsive website. Hosted on Vercel ensuring seamless accessibility and performance
- Created an engage platform tailored for exploring enthusiastic, focusing on usability and modern UI/UX Design
- Link : <https://trek-sphere-app.vercel.app/>

Todo-Website

HTML, CSS, JavaScript (DOM)

- Built a responsive to-do list application with features to create, edit, delete and mark tasks as completed, with data persisted using local storage
- Learned and applied Javascript DOM manipulation technique to handle dynamic UI updates and improve interactivity.
- Link : <https://shakthistodolistapp.netlify.app/>

- **Shakthi AI Assistant — RAG-Powered Portfolio Chatbot**

React.js, Fast API, LangChain, Gemini AI, Astra DB, Python, Google Generative AI Embeddings

- Built a full-stack AI portfolio assistant using a RAG pipeline that retrieves context from resume data stored as vectors in AstraDB and generates grounded HTML responses via Gemini AI
- Implemented a multi-model fallback system with intelligent quota-aware error handling that auto-switches across Gemini models, returning categorized user-friendly error states with retry support
- Implemented document ingestion, text chunking, embeddings generation, and vector database storage to enable semantic search and intelligent information retrieval.

CERTIFICATIONS

- **Great Learning:** Springboot for Web Applications
- **Coursera:** Dynamic Public Speaking
- **Coursera:** JavaScript, jQuery, and JSON

ACHIEVEMENTS

- **Smart India Hackathon (2023)** : Contributed as a team member, progressed through multiple internal selection stages. *(09/2023)*
- **IBM Z Datathon (2023)** : Secured IBM certifications, awarded a \$100 stipend, and gained practical experience in enterprise computing. *(11/2023)*
